

## Junior Lighting Controls Commissioning Engineer

An opportunity has arisen for an enthusiastic Junior Lighting Controls Commissioning Engineer to join a dynamic team.

The Lighting Control Technician will preferably understand our controls portfolio and be able to collaborate with clients and project managers to deliver the project requirements and on-site commissioning of lighting control systems accordingly.

This person will preferably have had hands-on work experience with different wired and wireless control systems in the lighting space, preferably with a luminaire manufacturer that produces LED-based products would be advantageous.

The role demands a very good understanding of network principles and practices, both for wired and wireless systems. It is important to maintain good communication with our internal teams and have a deep understanding of the technologies used by our customers.

Understanding of different dimmer topologies and architectures such as: DALI, 0-10V, ZigBee and BLE Mesh.

You must be a team player and have a good attitude to tackle tasks head-on and be able to collaborate cross-functionally.

Training can be given to the right quality of applicant.

### How you will contribute:

- Commissioning of lighting control systems to ensure optimal performance and functionality.
- Program and integrate lighting control systems, including DALI, and other protocols, to meet client specifications. Provide technical support and training to end-users, ensuring their understanding and satisfaction with the installed lighting control systems.
- Stay up to date with the latest industry trends, advancements, and codes to continually enhance our lighting control solutions.
- Grasping an understanding of the autonomy of our controls portfolio (systems & devices).
- Daily interaction with the controls team to ensure we are commissioning as per the standard work defined and addressing any questions raised.

### Key requirements of the role:

- Proven experience in commissioning lighting control systems, preferably in commercial or industrial projects.
- Strong troubleshooting and problem-solving skills with a keen attention to detail.
- Excellent communication and interpersonal skills to effectively collaborate with clients and project stakeholders.
- Proficient use of MS Office.
- Ability to work well in cross-functional team environments.
- Ability to communicate effectively and remain professional in circumstances under pressure.
- Ability to work to tight schedules/deadlines, while maintaining a positive attitude

The role is both office and site based, with an estimated 60% site time. A desk shall be provided at our HQ in Milton Keynes.
